

**Kartell**

## THE KARTELL UNIVERSE

If Kartell were to be summed up in a word today, it would Mixage, which is the essence of the contemporary, represented in design, as well as art, literature, and fashion.

With technological research and ideas constantly overlapping, the Kartell collection "mixes" and becomes part of increasingly varied universes through designs that reflect the contemporary way the world lives; no longer in a country or a specific geographical location, but rather in a proper global nation of interconnecting unique entities.

To Kartell, the art of knowing how to live means founding a movement that steps away from the stereotypes of the "total look" and reinforces the logic of combining pieces that coexist without cultural barriers and without style and fashion bias. Kartell has no concept of a single style or fashion; today, there can only be a melange of styles and fashions that combine and mix.

Kartell Flagship Store London

## SELLING AN EMOTION

To Kartell, Mixage also means exploring new worlds and new spaces with positively contagious ideas and products that put Kartell in new experiences in the retail world.

Kartell takes being an industrial brand to mean continuing to also "industrialise" its sales project, focusing on service and customisation, conversing with the client through the retail network connected and integrated to the company, which is given specific procedures to standardise the brand image, while customising the spaces based on where the shop is located.

## 2017 COLLECTION

It is design that combines with technology, which, rather than being an end in itself, contemplates consumer needs. Making a purchase must be a way to actively take part in an experience and not merely an act of spending. The meaning behind Kartell's modernised design is just that: responding to a "non-need" and making it into a must-have desire. And this is where new products come in; research into new frontiers in experimenting with materials and uses.

## Generic – Design Philippe Starck

Generic is a family of chairs created from the concept that essential is the natural evolution of the more traditional seat. Models A and C are intended respectively for the office world and the world of cafes, bars, restaurants, and recreational spaces in general, available in matte and soft touch finishes.

## KARTELL RE-MIX

New ideas and revisited designs combine in the catalogue, showing the continuity in renewing Kartell designs while introducing new pieces that are destined to become brand icons from the start.

Patricia Urquiola's table line expands alongside the Jellies collection to include Trama, a complete set of glasses for water, wine, soft drinks, and a pitcher in brilliant colourful or transparent PMMA, featuring the classic graphic found also on the dishes, which are inspired by Japanese ceramics, featuring sophisticated textures in natural earthy colours with a matte effect. Boxy is the Kartell line by Laufen, designed by Ludovica and Roberto Palomba, of soap dishes (in crystal, clear pink or green) and toothbrush holders (clear crystal base and body in shiny black or white, clear pink or green).

Three new pieces by Fabio Novembre: an original portable LED, transparent, "chargeable", injection moulded lamp that charges by placing it onto a charging base. Available in the amber, crystal, smoky grey, red, and wisteria versions. In addition, a stool inspired by the EUR in Rome. A cube printed with a replica of the Palazzo della Civiltà Italiana architecture, it can be multi-purposed as seat or support and fits into a variety of locations and styles.

The Kids line has an addition alongside the customised Lou Lou Ghost and small tables in the reinterpretation of the icon created by Anna Castelli Ferrieri: Componibili's classic round hole has been slanted into a winking eye, a nod to the emojis of today.

Villa Necchi Campiglio, Milan

## Sir Gio – Design Philippe Starck

A table in various colourful hues that is a demonstration of further innovation in polycarbonate use. Made using a highly innovative moulded plastic technology mould, the central leg gives the table high performance and stability in order to support the glass top. The bases are available in 2 colours (clear and smoky) and can be paired with 5 tops in bronze, pink, smoky grey, green, and yellow.

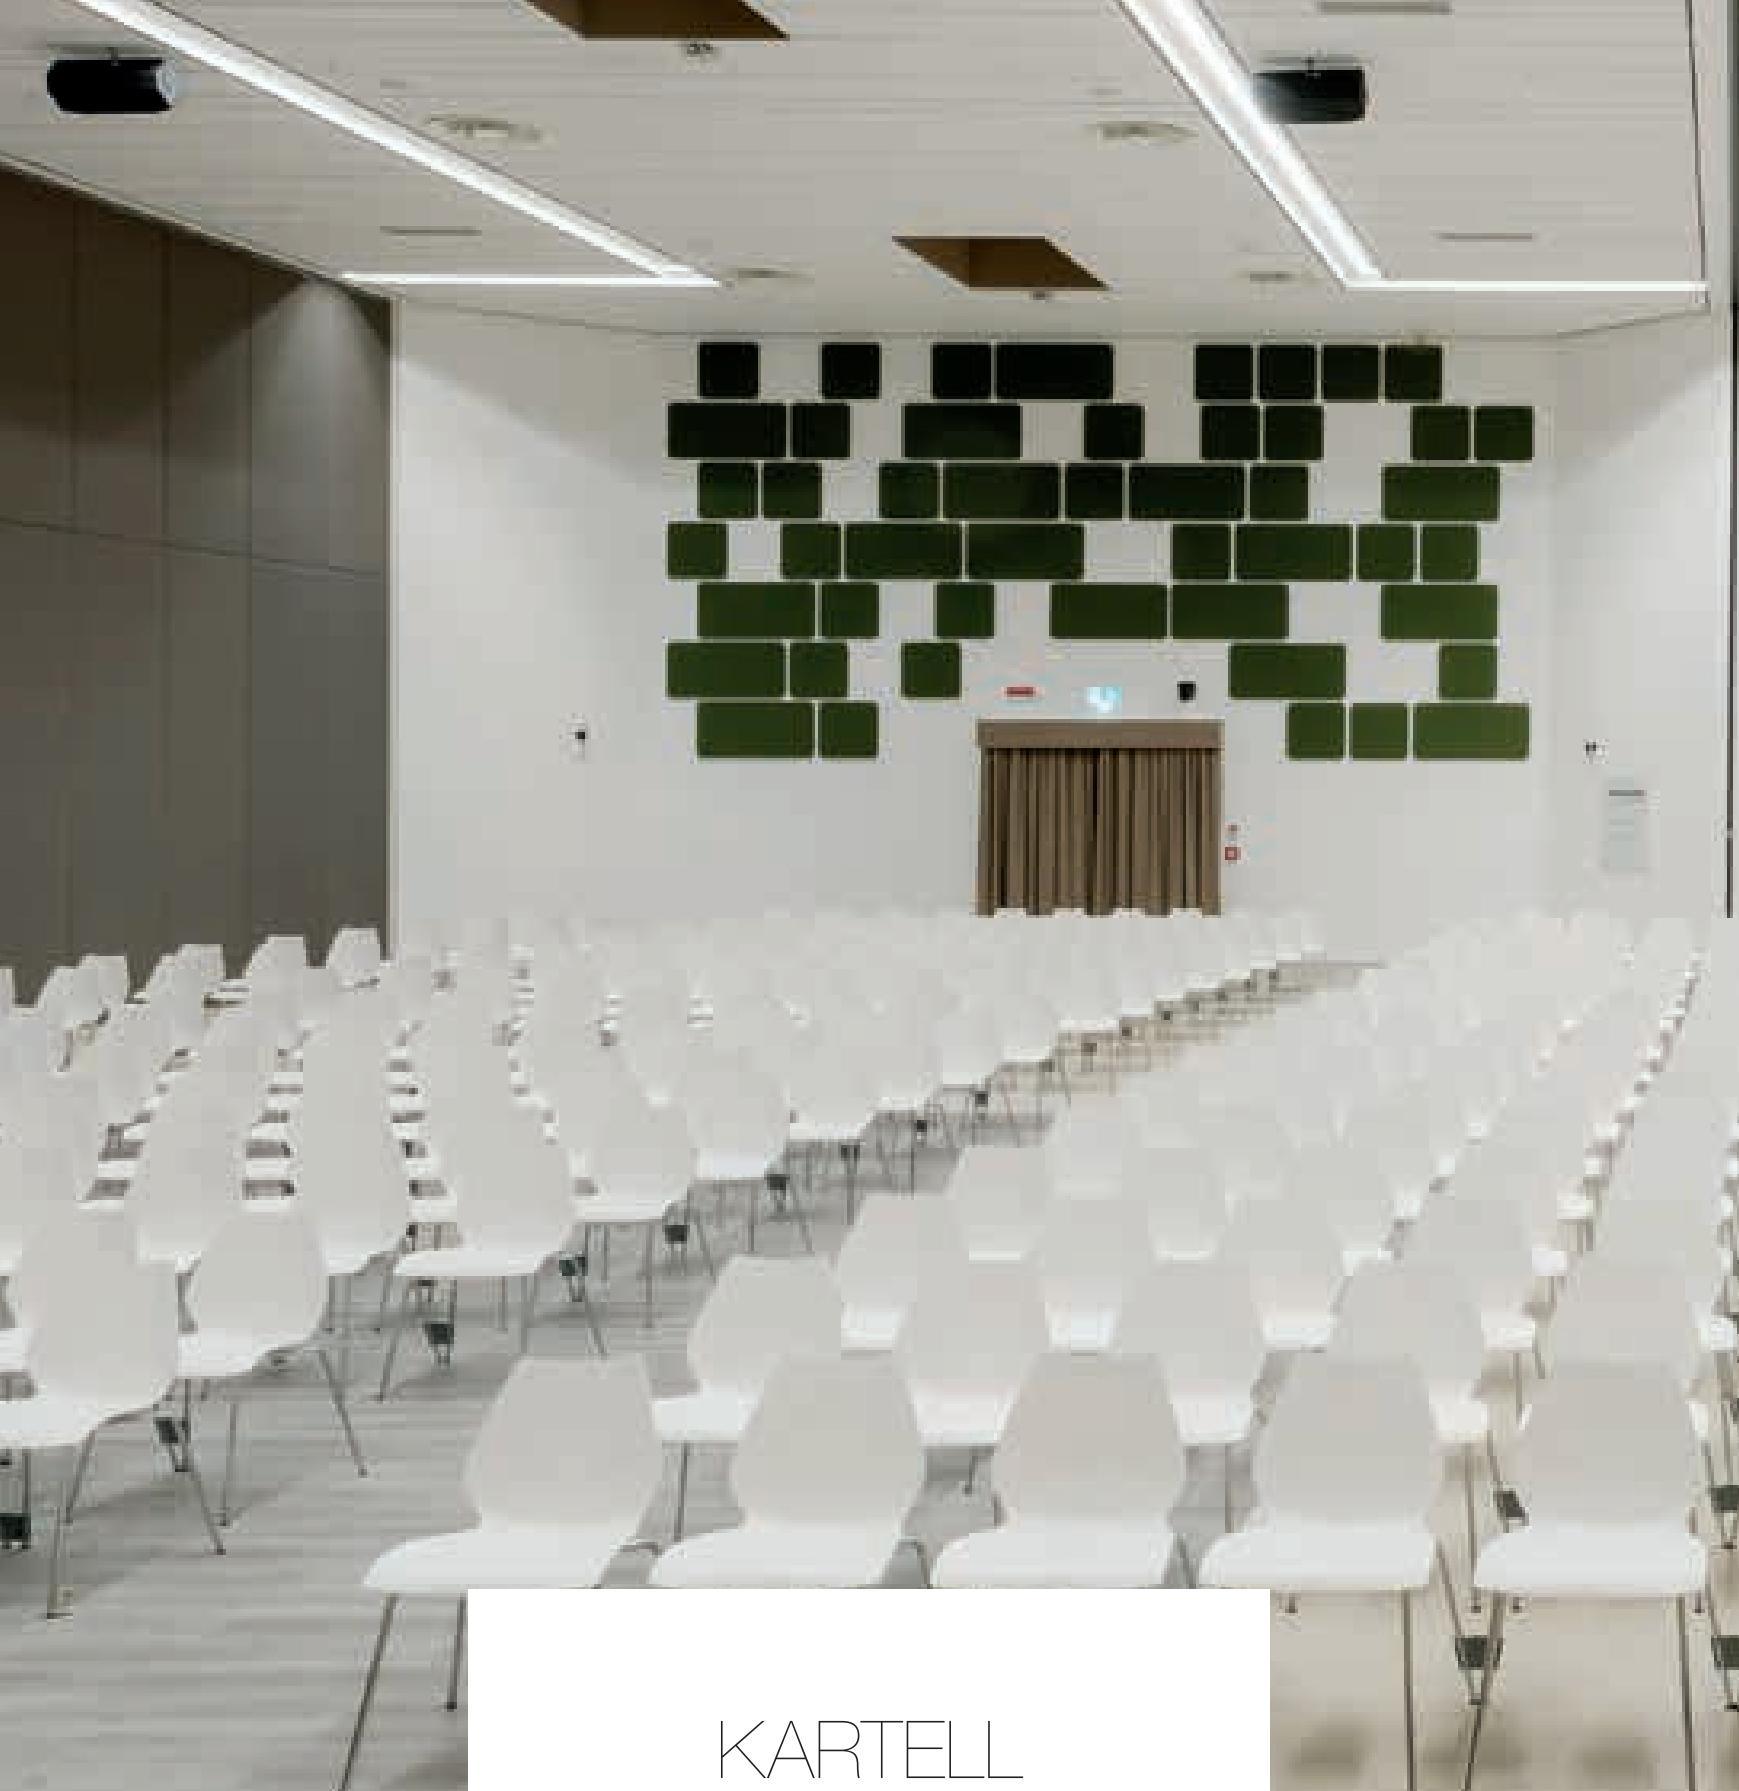

Microsoft House, Milan

## Aledin – Design Alberto and Francesco Meda

Aledin is Kartell's first technical lamp with a new function especially for the office world.

This LED table lamp has polycarbonate articulating arms with two aluminium rods replacing wires as conductors. The Tec version has a flat head and is ideal for office use. The Dec version has a small multi-faceted cone-shaped head and is intended for decorative purposes.

## KARTELL HOSPITALITY

The company is committed to consolidating its presence in the contract furniture sector, maintaining an open, focused dialogue in the hotel and restaurant industry, with bespoke solutions to meet specific sector needs. Kartell is available as a design partner in various contexts, from hospitality to corporate, bringing its unique versatile style to the table. Kartell can customise large orders and mass supplies due to its precision in industrial manufacturing, while always maintaining product quality and design, and especially quick delivery times.

## SPECIAL PROJECTS

Kartell uses various tools to tell the brand's story, creating specific, well-structured contents with projects, exhibitions, events, and partnerships in which Kartell products and philosophy are the stars of unique emotions. There are many occasions to represent the brand culturally and artistically. Some examples include the 6-month Plastic Fantastic exhibition at the D Museum in Seoul and the tribute to the 50th anniversary of Anna Castelli Ferrieri's Componibili with exhibitions and special events in Milan, New York, London, and Brussels. The emotion and the magic of music and song were the highlight of Celebrity Fight Night in Italy with tenor Andrea Bocelli at the Colosseum, furnished with Victoria Ghost.

## KARTELL ON STAGE

The Salone del Mobile 2017 was the epitome of the concepts of mixage and combining styles. The exhibition space featured platforms enhancing the various Kartell worlds using themed sets and new products, highlighted individually and set mixing new and iconic products for a unique, special Kartell style. The same exhibition concept but focusing on products intended for the contract furniture industry was used for Host, the biannual hospitality event. For the Moscow and Shanghai editions of the Salone del Mobile.Milano, the exhibition was set on the floor using rods to delineate and stage the different product types.

# How to read the price list

## GENERAL INFORMATION

By cultural and entrepreneurial choice, since its origins in 1949 Kartell has chosen to characterize itself as the market leader in the production of designer articles which use technology and plastic materials. This choice requires a great understanding of materials, transformation technology, as well as the ability to pinpoint marketable and producible designs in high quantities in order to cushion the high investment costs imposed by such technology. This experience has given life to a collection of technical advice and instructions for use which we have deemed useful to summarize in this instruction manual for Kartell furniture items.

The Kartell Catalogue is organised in 11 areas:

### **Chairs**

#### **Kartell goes Sottsass - A tribute to Memphis**

#### **Kartell Soft**

#### **Tables**

#### **Kartell Kids**

#### **Kartell in Tavola**

#### **Accessories**

#### **Kartell by Laufen**

#### **Kartell Lights**

#### **Kartell Fragrances**

#### **Kartell Books**

Within each area the products are organised homogeneously by family or, where this is not possible, by product type. Each item and different items of the same family are immediately recognisable at a glance by the photo and the technical diagrams which accompany them.

It is therefore easy to locate an item and it does not require specific knowledge of the Kartell collection.

## **How to read and use the price list**

The pages are organised vertically for each single family of products so that it is possible to read the technical information item-by-item, as the eye skims over them from top to bottom. In particular, the following details are given for each item:

### **Code number**

This is the number which accompanies each item or single component and must be quoted in each order.

### **Dimensions**

Overall dimensions are given in centimetres to allow customers to determine the space occupied by the product.

### **Weight**

This is the net weight of the item. It is a useful detail above all for those items (and.g. tables and seats) where it is necessary to estimate the suitability of the item for a specific use ( and.g. for public use ).

## **Information for packaged units**

The following are provided on the bottom of the page, in order: number of pieces, volume and dimension in centimetres. Pieces inside the same package cannot be purchased separately.

## **Materials**

In the bottom-left column of each page details of materials and essential technical and functional data are quoted. More information section *1. CERTIFICATIONS Reference standards*.

## **Symbols**

These indicate that the chair in question is stackable and specifies the maximum number of pieces allowed

They also indicate that the item can be used outdoors

Dishwasher safe

Suitable for use with food

Product not suitable for use in the microwave oven

Suitable for indoor/outdoor use

Suitable for indoor use

Recyclable

Not appropriate for children under 18 months

Not appropriate for children under 3 years

## **Colour samples**

The colours given are as close as possible to the actual shade of the item. They are however at most an indication by way of reference.

## **SYMBOLS AND SPECIFICATIONS FOR LAMPS ONLY**

**CL 1** Indicates the degree of protection against electrical shock. For class 1, insulation is "simple" and the apparatus's grounding devices must be used.

## **Insulation classification**

This indicates the level of protection against electric shock. In the case of Class II appliances, the insulation is "reinforced" and it is not necessary to take measures to earth the appliance.

## **Class III**

**III** This indicates an appliance with electric shock protection based on safety extra-low voltage where no voltage higher than its own is produced.

## **Direct assembly**

This indicates the type of surface upon which it is possible to assemble the appliance. The "F" symbol denotes that the appliance may be directly assembled on normally inflammable surfaces.

## **Level of protection**

This denotes the level of protection against penetration of dust, solid objects and humidity. The level IP20 relates to ordinary appliances which have no particular prescription.

## **Voltage**

This indicates the feed voltage of the appliance.

## **Attachment**

This indicates the type of lamp holder attachment on the appliance.

## **Maximum power output**

This indicates the maximum output which can be transmitted through the appliance without compromising safety.

N.B. The company reserves the right to modify the technical characteristics of catalogue products without notice. The public will be notified of any additions or modifications to product technical characteristics using the most efficient means.

A vibrant collage featuring a variety of glassware and food items arranged on a red and white checkered tablecloth. In the center, a large, faceted glass filled with yellow liquid (possibly juice or beer) is tilted, creating a dynamic composition. Surrounding it are several other clear glasses of different shapes and sizes, some containing water or light-colored liquids. Interspersed among the glasses are small bowls and dishes holding fresh fruits like strawberries, cherries, and blackberries. The overall aesthetic is bright and celebratory, suggesting a picnic or a festive meal.

# Kartell - The Culture of Plastics

"**Kartell - The Culture of Plastics**" is the first monograph on the Kartell design brand. Published by Taschen and available in six languages in two volumes (the first includes Italian, Spanish and Portuguese and the second includes English, French and German), the monograph is a chronological excursus through the technological, aesthetic and functional innovations and the activities of the Italian company, world leader in the industrial manufacture of design products made of plastic materials now in its third generation.

Narrating the tale in this coffee table book divided into decades from the '50s through to the new millennium are Silvana Annicchiarico, Gillo Dorfles, Chantal Hamaide, Marie-Laure Jousset, R. Craig Miller, Giovanni Odoni, Franca Sozzani and Deyan Sudjic while journalists Giulia Crivelli and Giovanni Odoni interview the current president, Claudio Luti, who in 1988 took over the management of the company from his father-in-law, Giulio Castelli.

A design industry of global fame synonymous with the concept of "transparency" in 400 pages full of

images describes its earliest stages, its evolution, the challenges successfully met, its incessant drive in research and technological innovation, its designers, the prizes won and its worldwide distribution.

But Kartell expresses itself best through its product icons that can be found in homes all over the world. There are historic shots and pictures from the archives, announcements and visuals, with detailed captions on technological innovations revealing the history of a company that has taught us to appreciate the culture of plastics.

## kARTell - 150 items, 150 artworks

kARTell - 150 items, 150 artworks. Not only a book photographs taken by the most relevant photographers and contemporary artists worldwide, such as Mario Testino, Peter Lindbergh, Helmut Newton, Steven Meisel, David LaChapelle. With absolute freedom, every artist chose a Kartell product, within the items from the historical until the current collection, in order to give birth to his personal interpretation. In addition to images, a rich collection of stories written by famous people within different fields (cinema, music, art, show business).

A gift idea for design connoisseurs as well as for fashion, visual arts and photography lovers.

## List of the UNI EN tests for steps:

### **UNI-EN Norm 131-1/94**

functional dimensions of the steps

### **UNI-EN Norm 131-2/93**

flexibility of the feet and of the platform

Standard EN 1728:2000 took effect in 2002 (UNI EN 1728:2002 in Italy) harmonizing at the European level testing methods for resistance and durability of all the types of domestic seating. This regulation, which replaces previous ones, prescribes much more severe testing procedures than in the past. Standard EN 15373 came into force in late 2007, updating the testing criteria, cycles and levels, with respect to EN 1728:2000.

Standard EN 16139:2013 came into force at the end of 2012, updating standard EN 15373 (see summary table).

In 2013, standard EN 1728 was updated to the EN 1728:2012+AC:2013 edition (in Italy UNI EN 1728:2012+AC:2013). Standard EN 1730:2000 updated with EN 15372:2008 (for Italy UNI EN 1730:2002) came into force in 2000 for the assessment of table performance took effect in 2000 to determine table performance. This standard stipulates the testing methods to determine the resistance, durability and stability of all types of tables. Tests are conducted on an assembled and ready-to-use table. The references to the characteristics tested are expressed with respect to the paragraph in the standard, as follows:

## STANDARD UNI EN 15373:2000

### paragraphs 5.1 - 5.2

General safety requirements

## STANDARD UNI EN 1022/2005

Stability

## STANDARD UNI EN 1728/2000

### paragraph 6.2.1

static load on the back of the seat

### paragraph 6.2.2

static load on the front edge of the seat

## 2. CERTIFICATIONS: Lighting Regulations

### REFERENCE MARKS

**CE** – indicates the conformity of the products bearing the acronym with the essential requisites of European Community directives.

**ENEC** – the European trademark for high quality in electrical products which indicates conformity with current European regulations is recognised as the equivalent of the individual national trademarks in 20 European countries, signatories to the Lum Agreement.

**cUL/CSA** – American and Canadian trademark of quality for electrical products. It certifies product conformity with current American and Canadian regulations.

**PSE** – Japanese trademark of quality for electrical products. It certifies product conformity with current Japanese regulations.

**NOM** - Mexican trademark of quality for electrical products. It certifies product conformity with current Mexican regulations.

**EK/KC** - Korean trademark of quality for electrical products. It certifies product conformity with current Korean regulations..

**CB Certificate (Australia and New Zealand)**  
Certification attesting product conformity with international IEC regulations, can be issued with specific national deviations.

**CB Certificate** – Certification attesting product conformity with international IEC regulations.

**CCC** - China Compulsory Certificate The brand certifies product compliance with Chinese standards and is mandatory for lighting products imported in China.

**SASO** - Certification, certifying SGS compliance with Saso standards, required to import lighting products for the Kingdom of Saudi Arabia and guaranteeing their compliance with applicable standards and technical regulations

### ECO-CONTRIBUTION

Introduced in Legislative Decree no. 151 dated 25 July 2005 (updating directives 2002/95/EC, 2002/96/EC and 2003/108/EC), the eco-contribution is an environmental charge used to pay for waste management of electrical and electronic equipment (WEEE). This charge is used to finance all phases of treatment, transport, recovery and disposal of electrical and electronic appliances. Kartell lighting prices include the WEEE.

### NOTICE PURSUANT TO ARTICLE 13 OF LEGISLATIVE DECREE NO. 151 DATED 25 JULY 2005.

Directive 2002/96/CE (waste electrical and electronic equipment: WEEE):

User information: pursuant to article 13 of Legislative Decree no. 151 dated 25 July 2005, no. 151 "Updating of Directives 2002/95/EC, 2002/96/EC and 2003/108/EC, regarding the reduction in the use of dangerous substances in electrical and electronic equipment, and the disposal of waste" this product is conform.

The barred bin symbol on the equipment or their packaging indicates that at the end of its useful life, the product must be disposed of separately from other waste. The user must take the equipment to an authorised recycling centre for electronic and electric waste, or return it to the original vendor when purchasing an equivalent product, on a one-to-one basis. The appropriate collection for environmentally-compatible recycling, treatment and disposal contributes to avoiding possible negative effects on the environment and its health and encourages the reuse and/or recycling of the materials used in the equipment. Improper disposal of the product by the user will result in the application of the administrative sanctions stipulated by regulations in force.

# 3. CERTIFICATIONS: ISO 9001: 2008

## COMPANY QUALITY CERTIFICATION: ISO 9001

In 1996, Kartell decided to certify its Corporate Quality Management System in compliance with UNI EN ISO 9001:1994 standards.

In 2005, the company aligned its Quality Management Systems with the standard UNI EN ISO 9001:2000.

In 2008, the company renewed its ISO 9001:2000 certification.

And, in 2010, it switched to UNI EN ISO 9001:2008. In 2017, Kartell will update its certification standard to UNI EN ISO 9001:2015.

A guarantor for this certification process is the I.I.P. (Italian Institute of Plastics), which is itself accredited by SINCERT and CISQ, the Italian federation of accreditation bodies for Quality Management Systems.

CISQ is part of IQNET (International Certification Network), a supranational body which guarantees mutual recognition of the ISO standard in countries worldwide.

The attainment and maintenance of this certification, made possible by the commitment and perseverance of all company offices involved, testifies to the continued research into ever higher levels of quality in company management systems.

A copy of the Quality Certification is available for downloading on [www.kartell.com](http://www.kartell.com)

# 4. CERTIFICATIONS: ISO 14001: 2004

## RECYCLABILITY

Recyclability, sustainability, eco-compatibility - in a nutshell, respect for the environment - these are the themes which the world community takes very much to heart.

It may seem absurd to talk about environment in terms of productions having plastic materials as their common denominator. Nevertheless, contrary to common belief, Kartell products are perfectly recyclable. To simplify the recycling process, in fact, the various components of Kartell products can be easily separated out and traced back to their single material elements. The plastic parts of each product also bear clear identification markings in accordance with the DIN 6120 specification, part 2, just so that they can be correctly identified and to facilitate recycling.

## PACKAGING

All product packaging (paper, cardboard and plastic wrap) is 100% recyclable according to local recycling practices.

Contributing to environmental sustainability means avoiding waste and improper waste disposal.

For more information on the recyclability of each product, please visit [www.kartell.com](http://www.kartell.com)

## DIN 6120 PART 2 - RECYCLING SYMBOLS

The code within the logo identifies the compound in accordance with the following table:

01	02	03	04	05	06	07
PET	PE-HD	PVC	PE-LD	PP	PS	O

## GREENGUARD

In its continuing commitment to protecting its customers' health, Kartel obtained Greenguard certification for its products in 2014.

When purchasing a Greenguard-certified product, consumers can be certain the product has been inspected, does not pollute and is not dangerous.

## GREENGUARD: CERTIFIED CATEGORIES

Plastic chairs, upholstered chairs, accessories and lamps, Multiplo tables

## ISO 14001 CERTIFICATION: 2004

In 2011 Kartell achieved UNI EN ISO 14001: 2004 certification for its support of an effective Environmental Management System, an international standard recognised throughout the world and developed about 10 years ago which defines development and implementation parameters in corporate processes in order to achieve an effective environmental management system.

## WHAT IS ISO 14001?

This certification attests that the organization certified has implemented a management system capable of controlling environmental impact in its own business and systematically endeavours to improve it in a sustainable, effective and consistent manner. ISO 14001 certification is not obligatory but is the result of the voluntary choice of the Company which decides to define, implement, maintain and improve its own environmental management system.

In 2017, Kartell will adapt the certification standard to UNI EN ISO 14001:2015.

A copy of the Quality Certification is available for downloading on [www.kartell.com](http://www.kartell.com)

# 5. General Terms and Conditions of Sale

## I. SCOPE

1. These General Terms and Conditions govern sales contracts entered into by Kartell S.p.A. ("Kartell") and its clients, professionals that purchase and resell ("Client") the Goods presented in the Kartell catalogue ("Goods"). The General Terms and Conditions of Sale may be waived or modified only through a written agreement between Kartell and the Client.

## II. ORDERS

1. Each Product order constitutes an irrevocable offer by the Client. Kartell reserves the right at its sole discretion, to accept, modify or refuse orders at its sole discretion, or to suspend delivery should the Client not provide Kartell with guarantees for the request and not respect the sales guidelines issued by Kartell from time to time.
2. Excluding purchases made for specific purposes agreed in advance with Kartell or in the "contract" channel, the Goods may only be resold retail at the sales point indicated to Kartell.

## III. PRICE

1. Unless otherwise agreed, the prices of the Goods indicated in the price list are ex works for deliveries within the European Union, and ex Kartell warehouse for deliveries outside the European Union.
2. The minimum amount of each order for delivery inside Italy is €400.00 (four hundred euros) excluding VAT, and €500.00 (five hundred euros) excluding VAT within the European Union. Should the order not reach this amount, the order may be accepted with a minimum additional charge on the Client invoice of €25.00 (twenty-five euros) in the first case, and €40.00 (forty euros) in the second case as a "partial contribution to expenses".
3. The price applied to the Goods is that in force at the order date. VAT must be added to the prices indicated in the price list (minus any discounts) in accordance with the law.

## IV. OWNERSHIP

1. Pursuant to Articles 1523-1526 of the Italian Civil Code, ownership of the Goods will be transferred to the Client only upon full payment of the price. In the event of hire purchase and Client default, Kartell shall retain any instalments already paid by way of compensation, without prejudice to claims for greater damages.

## V. PAYMENTS

1. Payment is considered to have been made only when Kartell is in possession of the amount. In the event of payment by cheque or other meth-

od, the payment method must be considered to be accepted subject to payment in due course.

2. However, order payment may not be suspended or delayed due to Client claims or defences regardless of ownership, nor may the Client offset debits and credits with Kartell.

3. In accordance with Article 1186 of the Italian Civil Code, failure to pay or partial payment of any amount owed to Kartell shall automatically place the Client in default with the resulting expiry of the time limit and Kartell's simultaneous right to suspend deliveries, refuse or cancel orders, modify sales conditions and take action to ensure full payment of the credit, in addition to expenses, interests and damages. Late payment will also result in the automatic application (with no prior notice) of late interest at the rate established by Article 5 of Legislative Decree 231/2002.

per Article 1495 of the Italian Civil Code, on the date of acceptance of Product delivery by the Client or its representatives.

2. Any claim regarding the Goods (excluding those identified at the time of receipt and regarding shipping) must be made in writing to Kartell within 8 (eight) days of the discovery, and in any case within 12 (twelve) months of Product delivery acceptance by the Client or its representatives in compliance with the following procedure: (Par. 6. Claims)

## VI. DELIVERY

1. The delivery date is purely approximate and non-binding, with Kartell being entitled to make partial deliveries.
2. Should delivery be delayed as requested by the Client, Kartell reserves the right to charge monthly warehousing and/or handling expenses equal to 10% (ten percent) of the amount indicated on the invoice, beginning in the month following notice to the Client of the Goods' availability.
3. Any Product order cancellation or rejection at receipt will result in the application of a penalty on the Client of 30% (thirty percent) of the amount indicated on the invoice, without prejudice to claims for greater damages.
4. Should the Goods be shipped outside EU territory, the Client must provide Kartell all documents certifying Product delivery within one (1) month. Should the Client fail to do so, Kartell reserves the right to charge the Client all expenses incurred to complete the sale operation.
5. At delivery, the Client must carefully inspect the quantity and condition of Product packaging. On pain of forfeiture, any obvious defect must be: (i) reported in writing to the shipper at the time of delivery, indicating expressly on the consignment note "conditional acceptance", and (ii) promptly reported in writing to Kartell within 48 (forty-eight) hours of delivery, in compliance with the instructions below.
6. Any returns must be approved in writing in advance by Kartell: unauthorised returns will be returned to the sender along with delivery charges.

## VII. GUARANTEE AND CLAIMS

1. The legal guarantee for the Goods begins, as

# 6. Claims

## CLAIMS FOR PRODUCT NON-CONFORMITY SHIPPING DAMAGE

Should one of the following situations be noted at the time of Product delivery

- a) merchandise missing with respect to accompanying document
- b) merchandise different with respect to accompanying document
- c) damaged packaging

the Client must

1. write reservations on the consignment note (either on the carrier's copy or on the recipient's copy). Written reservations must be detailed, as general reservations are not sufficient to allow proper processing of the claim
2. Complete the reporting form (Transport claim form) in full: the form (facsimile shown below) is available from Kartell's regional agent, or Kartell's Sales Office at [transport@kartell.it](mailto:transport@kartell.it);
3. Send a copy of the consignment note and the reporting form within 48 (forty-eight) hours of Product receipt.

To notify Kartell of a claim in the event of Product non-compliance, send the following documents to the Kartell Customer Care Office at [quality@kartell.it](mailto:quality@kartell.it):

1. The product non-compliance form (Generic claim form) completed in full. the form (facsimile shown below)

mile shown below) is available from the Kartell Customer Care Office, at the e-mail address above, or from Kartell's regional agent;

2. Photographs showing the non-compliance (at least one photo per non-compliant Product)

Should the claim concern a new product (just received from the Client or just delivered by the Client to the end customer), you must send a photograph of the complete packaging and detailed photographs, copies of the two labels (shipping and production), as shown below.

Please keep the Quality Control slip found inside the product's card since the Kartell's Customer Care Office may request the data it contains to check the production lot.

Only claims sent to the addresses above containing all of the elements requested will be processed by Kartell.

The--even partial--absence of the requested documentation will prevent Kartell from processing the claim.

3. With reference to the Consumer Code, Legislative Decree 206 of 6 September 2005, Articles 131 and 132, the Client loses and forfeits any right of recourse against Kartell if it does not notify Kartell in writing of an end-customer claim within 8 (eight) days of receipt of the end customer's complaint using the procedure described above.

4. Kartell shall not be liable for damages caused by improper use, tampering, normal wear or failure to respect the assembly and maintenance instructions included in the product card, or component modifications or replacements with others not in accordance with the original specifications.

5. In any case, Kartell's liability is limited to the value of the defective goods: Therefore, Kartell may not be held liable, among other things, for expenses sustained by the Client or end customer or for any other damage claimed (direct or indirect).

## VIII. COMPETENT COURT

1. Any disputes arising directly or indirectly from the contractual relationship are the exclusive competence of the Milan court.
2. Applicable law is substantially Italian (excluding any application of foreign laws).

# 7. Use and Maintenance

Simple care is needed for the maintenance of Kartell products to retain the original features of the materials.

## PLASTIC MATERIALS

**Cleaning.** Use a soft damp cloth with soap or a liquid detergent, preferably diluted with water.

The use of the following substances must absolutely be avoided: acetone, trichloroethylene, ethyl alcohol or detergents containing even small quantities of these substances which cause irreparable damage to the plastic of which the products are made.

We recommend always using a damp cloth to prevent plastic surfaces from becoming charged with static electricity which attracts dust. Also avoid abrasive solvents, cleaning powders and creams, steel wool or rough sponge cloths.

**Use.** Do not drag objects across the plastic surface, even if it has a scratch resistant finish, since sharp objects can damage the plastic just as they would damage wood or metal. Do not place very hot plates or pots directly on the surface, but always use a cloth or trivet.

## WOOD

**Cleaning.** As with plastic surfaces, use a soft damp cloth. Do not use alcohol or other spot-removers. For a deeper cleaning use a little non-abrasive liquid detergent and wipe in the direction of the wood grain. Dry the surface well with a soft cloth. Never use acetone, trichloroethylene or ammonia.

**Use.** Moisture in wood can cause swelling which is normal in a natural material. Our woods hold up well under normal temperature and humidity conditions. Slight color variations from one piece of wood to another are normal and these tend to disappear with time. Wood can change color over time. To delay this, it is best to avoid placing it in direct sunlight.

## COVER

Kartell uses different kinds of covers, for each one you may find the appropriate cleaning and usage instructions within the instruction card enclosed in the packaging.

## METALS

**Cleaning.** Normal dirt on either painted or plain metallic steel or aluminium surfaces must be removed with soap and water (preferably hot) and neutral liquid detergent; dry with a soft cloth or with a chamois cloth. Never use cleaning powders, abrasive or steel wool pads, which can cause scratching, or liquid detergents that contain chlorine or its derivatives such as bleach or muriatic acid.

**Use.** Avoid spilling grapefruit juice, cola, salt and coffee on metal surfaces. These can cause indelible stains. To remove black marks on aluminium chair legs, products especially made for steel finishes or non-abrasive car polishes are recommended.

# 8. Materials used

## PLASTICS

Primary chemical and physical characteristics of the materials used in manufacturing Kartell products. Plastics are organic materials created by man. Their technological and physical characteristics are determined by polymers, in which one or more types of monomers are joined to form a molecule. Plastics can be divided into two major groups based on their chemical and technological performance: Thermoplastic and thermosetting. In recent years, technological research has made it possible to create increasingly sophisticated materials, whose performance and physical appearance are unlike that of what we generally consider as being "plastic". These types of plastic contain not only polymers, but also additives, fillers and reinforcements which give them better physical, chemical, mechanical or processability properties. These are called composite materials or technopolymers.

## THERMOPLASTICS

Thermoplastics are formed by resins which can be made more elastic through heating or harder through cooling. The temperature values depend on each individual resin. They are composed of numerous interwoven independent molecular chains. When heated, these chains slide, enabling the plastic to flow. When cooled, they become hard again. Many thermoplastics are used in the production of Kartell products, and are almost always mixed with other materials to enhance their performance, thereby becoming thermoplastic technopolymers. The main thermoplastics used are Polyolefins, the best known of which are PE (Polythene or Polyethylene) and PP (Polypropylene), ABS (Acrylonitrile, Butadiene, Styrene), PS (Polystyrene), PMMA (Polymethylmethacrylate), PA (Polyamide) and PC (polycarbonate). Their main characteristics:

### Polyolefins

Polypropylene and polyethylene are thermoplastic polymers belonging to the family of polyolefins: Polyolefins are high molecular weight hydrocarbons. They include low-density (LDPE), linear low-density (LLDPE) and high-density polyethylene (HDPE), polypropylene (PP) and polymethylpentene (PMP or TPX). Polyolefins are break-resistant, non-toxic and non-contaminating materials. These are the only plastics lighter than water. They easily withstand exposure to nearly all chemicals. They are easy to colour and modify to create specific alloys, using minerals like talc, as required for the product.

Polypropylene (PP) is lightweight, translucent and

strong. It has excellent mechanical and chemical resistance (it has no known solvent at room temperature). It's weather resistant, so it can be used to create products for outdoor use. Thanks to its features and its warm and soft physical appearance, polypropylene is particularly suitable for manufacturing chairs.

Polyethylene (PE) is a chemically inert plastic. It has no known solvent at room temperature; aggressive solvents will cause softening and swelling, but these effects are usually reversible.

### acrylonitrile-butadiene-styrene (ABS)

ABS polymers are a single technopolymer family. The name comes from the first letter of the three monomers composing them:

- Acrylonitrile (A) provides thermal resistance to aging;
- Butadiene (B) helps maintain properties at low temperatures, technical resistance, and impact resistance;
- Styrene (S) gives shine, solidity and ease of processing.

By varying the proportions of the three components, a wide variety of types of ABS can be created for a wide variety of uses: in the automobile sector, office equipment, electrical and electronic products, appliances, and naturally, furniture. ABS are resistant to high temperatures, chemical compounds and ageing, and are solid and impact resistant. They can be given high, medium and low (matte) gloss surface finishes and are easy to colour. However, some types of ABS are sensitive to certain chemical compounds and solvents. Therefore, the anti-cracking properties need to be assessed for each application. ABS aren't generally weather resistant. If the material is not protected, it may fade and become brittle. They are used for most traditional Kartell articles, such as round and square elements and modular bookshelves.

### Polystyrene (PS)

PS is the result of styrene polymerization. It is a rigid and non-toxic polymer with excellent dimensional stability and good chemical resistance to water-based solutions but limited resistance to solvents. It is ideal for products such as waste baskets and office articles. It is used in its so-called "aesthetic" version for its good surface appearance. It is also used as HIPS (scratch-resistant polystyrene), with added rubber to make it scratch resistant.

### Polymethylmethacrylate (PMMA)

Polymethylmethacrylate has high aesthetic and functional qualities. It is transparent, solid and weather resistant. Acrylic resins are used to make all transparent products, including in the furniture

sector. So-called "plastic rubbers" can be added to improve their resistance properties, making it impact resistant. Antonio Citterio's Mobil drawers are made of this special combination.

### Polyamide Nylon Resins (PA6)

This is a group of linear polymers with repeated amide linkages along the back-bone. These are produced through the polymerization of amino acids. Nylon is strong and tough, abrasion, impact and wear resistant. Numerous fillers can be added to improve its features. It is used for clothes stand bases or Oxo trolley supporting frames, parts which support weights

### Polycarbonates (PC)

Polycarbonate refers to a thermoplastic polymer. When producing objects using this material, the polycarbonate is melted and injected under high pressure into a mould, to give it the desired shape. There are two principal processes for producing articles with polycarbonate:

- Extrusion: here, the polymer is heated, then injected into a die with the shape of the final product. This process is used to manufacture pipes, sheets and profiles
- Injection moulding: here, the polymer in granular form is heated, injected into a mould, then cooled, giving it the shape of the final product. This is the most commonly used process for objects in a variety of sectors.

### The advantages of polycarbonate

Polycarbonate:

- has excellent mechanical, thermal and electrical properties
- has high resistance to fire and impacts, and high elasticity
- is easy to recycle and process

These characteristics make this material ideal for a variety of applications: from automobiles to packaging to appliances to consumer products. Kartell was a pioneer in the sector, demonstrating polycarbonate's many applications in the furniture sector as well.

### Polyvinyl Chloride (PVC)

PVC's structure is similar to polyethylene, but contains atoms of chlorine. The chlorine atom makes PVC vulnerable to some solvents but also more resistant in many applications (PVC has a considerable resistance to oils and a very low permeability to gases). Polyvinyl chloride is transparent with a slightly bluish tint, and can be coloured in a vast range of tones.

### Styrene Acrylonitrile (SAN)

Styrene Acrylonitrile belongs to the family of styrenes, and is one of the best in terms of mechanical characteristics. SAN is rigid and hard,

either transparent or opaque. Pieces made using SAN have a high dimensional stability and can be "easily" injection moulded.

## THERMOSETTING PLASTICS

These resins can no longer return to their original state after they have been polymerized through heating or other means. Before transformation, thermosetting plastics also have a chain structure. During polymerisation, atomic cross links are created between molecules, forming a complex interlinked network. These atomic cross links prevent the plastic from sliding during subsequent heating processes. Excessive heat damages polymers. The thermosetting resins used in Kartell articles are: PUR (polyurethane), SMC (Sheet Moulding Compound), BMC (Bulk Moulding Compound) and melamine.

### Polyurethane (PUR)

Polyurethanes are formed by two components, polyol and isocyanate, which when combined in different types and percentages form countless materials with differing and contrasting characteristics: from soft polyurethane used by the foam industry to the rigid structural variety, used to make the Battista trolley tops by Antonio Citterio.

### Melamine

Melamine resins--commonly called melamine--are thermosetting resins that are colourless and odourless, resistant to water, chemical agents, abrasion and heat, and are extremely transparent to light.

Melamine resins are used primarily for tableware (especially dishes), plastic laminates and kitchen accessories.

Melamine resin utensils and bowls are microwave safe, absorbing radiation and heat.

### SMC AND BMC

These are thermosetting resins that are mixed with thermoplastic resins and impregnated with fibreglass. The difference between the two resins comes from the method by which they are impregnated: in SMC the resin impregnates a sheet of fibreglass, while in BMC the moulding mass is impregnated with glass fibres. Fibreglass fill is used to create an especially resistant material, used in Philippe Starck's Miss Balù table tops.

### Fibreglass Reinforced Polyester (GRP)

GRP belongs to the family of thermosetting resins; it has high mechanical characteristics, so much so that it is also used in the automobile and electronics industries. Over time, two technologies have been developed allowing economical use of this material in mass-produced products: SMC (sheet moulding

compound), where the resin impregnates a sheet of fibreglass and BMC (bulk moulding compound) where the resin impregnates disordered glass fibres. Thanks to these technologies and the material's high mechanical characteristics (up to ten times greater than thermoplastics), highly technological products can be produced that are capable of replacing sheets and die-casting in many cases.

## WOOD

Natural wood is taken from the plant, either deciduous or evergreen, and is classified commercially as hardwood or softwood. Kartell uses some of the best wood available on the market. It is processed to guarantee long wear and resistance in addition to respect of all environmental standards. Since wood is a natural material, there can be colour variations from piece to piece. The plastic laminate that is sometimes combined with wood is created through lamination and is composed of phenolic and melamine plastic resins and thermosetting polymers. It is used in the furniture manufacturing sector as a coating for chipboard, MDF, honeycomb and other wooden panels.

## METALS AND PAINTS

In Kartell products, metals are limited mainly to structural parts or to emphasize particular aesthetic details. The technologies used are extrusion and die-casting. Often, to improve the surface and aesthetic quality, metal parts are painted: in this case using powder coatings are used, which can be electrically charged to adhere perfectly to the metal surface. The paints used for metal are usually epoxy polyesters. Thanks to their greater durability and resistance to light, abrasion and weather, the products made using these materials can be used outdoors. Die casting is used primarily to solve certain complex aesthetic issues, such as for the legs of the Battista and Gastone carts designed by Antonio Citterio. The die-cast parts can be used as is or coated with epoxy-polyester.

On many plastic products or parts of products, more traditional paints, such as acrylic or polyurethanes are used. In this case painting serves to enhance the aesthetic quality of the surface finish and improve durability.
